The number of orders now existing is not less than 215, any one or group of which from a given country may be wined out of existence or grouped, or a new order may even be created to mark some notable event. It is impossible to compare the standing of the various orders of the various countries, although some are far more noted than others, as, for instance, the Legion of Honor of France, the Order of the Garter of Eng-land and the Golden Fleece of the Latinspeaking countries. There is one order, however, the Order of All, which has but a single member-the Shah of Persia. Then there is the Order of Moreto, conferred only on the president of the Acad-emy of St. Luke, Rome, but on retiring from office he retains the order as evidence of past service.

Dr. Hough was created chevalier of the Order of Charles XII of Spain nearly twenty years ago. The honor came as a result of his services in connection with the exposition at Madrid in 1893, during which he was practically in charge of the American exhibit.

"I heard I was to be decorated before left Spain," said Dr. Hough, "but I didn't take much interest in the report I had worked hard-but I didn't think I had done enough to deserve a decoration. But a few weeks after I got home I received a message from the Spanish minister telling me the king some sort of a jeweled affair, but I'm one I have forgotten what it looks like. I think, though, I have the diploma put away somewhere at home."

Stejneger's decoration came from the King of Norway shortly after the separation of Norway and Sweden. He "I don't know just why I should have been given a decoration," said he. "When a country bestows an order on one of its own citizens a reason is assigned, but this is not always done when a foreigner is decorated, and no reason was assigned when I got mine.
